Informational Notification

RE: Untested Harvest Batches from WTJ Family Enterprises LLC

The Colorado Department of Revenue (DOR), in conjunction with the Colorado Department of Public Health and Environment (CDPHE), is issuing an informational notification due to the identification of Medical Marijuana harvest batches produced by **WTJ Family Enterprises LLC (doing business as “WTJ MMJ Supply”)** that were not tested in accordance with required testing regulations. Upon inspection of WTJ Family Enterprises’ cultivation facility, substances assumed to be mold were found on surfaces within the facility. The CDPHE and DOR deem it a public health and safety concern when marijuana is found to have not been appropriately tested in accordance with [Colorado Marijuana Rule 4-115](#). This is an informational notification rather than a health and safety advisory because samples of Medical Marijuana from harvest batches sold to consumers were not available for testing to confirm contamination.

Consumers who have affected marijuana in their possession may wish to destroy it or return it to the Medical Marijuana Store where it was purchased for proper disposal. Consumers who experience adverse health effects from consuming the product should seek medical attention immediately and report the event to the Marijuana Enforcement Division by submitting a [MED Reporting Form](#).

The affected marijuana should have a label affixed to the container that, at a minimum, indicates the license number of the Regulated Marijuana Business that cultivated the marijuana. Consumers should check the label of their Regulated Marijuana flower (bud/shake/trim) for cultivation license number **403-00239**. This cultivation license is no longer an active license, but affected inventory should still have this license number on its label. **The potentially affected marijuana was sold from the following Medical Marijuana Stores in Colorado Springs, CO:**
